## IMPLANON NXT® TRAINING SESSION 2012

**Implanon NXT®** is a single-rod, PBS listed, contraceptive implant that takes only minutes to insert and remove, and offers women the convenience of highly effective contraceptive protection for three years. The insertion technique is different to the original Implanon, so those who attended training with the original Implanon will need a short update session to learn the new technique

- Training is offered to those unfamiliar with the product, as well as to those who may have participated in previous training sessions and wanting a **refresher course**.
